Singapore Standardisation Strategy

This Strategy aims to provide vision and direction for standardisation as Singapore responds to new and rapid developments in this global economy. A key focus of the Strategy is to emphasise the development, use and implementation of standardisation. This is to ensure that the collective objectives of trade facilitation, productivity and quality improvement, safety, health and environmental protection can be achieved for our businesses and consumers. For more details on how standardisation can benefit you and your business, please visit www.standards.org.sg.

New International Standard on Risk Management: ISO 31000:2009

Enhancing Organisational Resilience

Date: 8 March 2010 (Monday)

Time: 1.30pm to 5.15pm

Venue: SPRING Singapore

Auditorium, Podium Block, Level 3

2 Bukit Merah Central

Singapore 159835

Supported by:

Introduction

Risk management is essential in all organisations and plays an integral role in organisations' decision-making and strategic planning. Risks from financial markets, project failures, legal liabilities and natural causes are only some of the more important risks. Effective risk management helps enterprises gain greater insights into the risks and implications associated with every business decision, thereby maximising business performance.

The international standard ISO 31000:2009, *Risk Management – Principles and Guidelines* and ISO Guide 73, *Risk Management – Vocabulary* was published on 15 November 2009. The ISO 31000 standard provides a framework to guide organisations in their risk management process. It seeks to integrate this process into the organisation's overall governance, strategy and planning, management, reporting processes, policies, values and culture.

The standard can be used by all types of enterprises for a wide range of activities, including strategies and decisions, operations, processes, functions, projects, products, services and assets.

This seminar will provide insights into the ISO 31000 standard and the application of risk management in specific situations.

Who Should Attend

- Senior Management
- Directors and Managers
- Consultants
