Dear Mr Lim

**RE: COLLABORATION WITH SBF ON MR MIKE SPLINTER'S TALK 'UNLOCKING THE POTENTIAL OF SOLAR ENERGY' ON 8 JULY 08**

It was nice meeting you at the above event.

2 SEI is glad to have partnered the Singapore Business Federation (SBF) to promote greater understanding of the capabilities of solar energy through Mr Mike Splinter's talk on the said subject. The sharing session by Mr Splinter was well-organised and informative. In fact, we have received compliments from participants on the talk and they look forward to attending more of such sessions in the future.

3 We are heartened by the many knowledge-sharing initiatives SBF has organised and lined up, to create greater awareness of sustainable development issues while growing the business community. Increasingly, it is important for businesses to recognise and to appreciate that they play a critical part in mitigating climate change through making business decisions that will not compromise environmental sustainability while ensuring profitability. We value SBF's contributions to bridge this message to the business community through its pro-business initiatives.

4 To-date, we have partnered SBF over 4 programmes since our first collaboration in January this year. It has been a great experience working with Mr Patrick Chan and Mr Donny Lim from your Industry Development Unit. They have good ideas and are quick in translating them into useful programmes for the business community. Indeed, each collaborative effort has been meaningful & successful. We look forward to a continued rewarding partnership with SBF in the future.

5 SEI would like to take this opportunity to wish SBF every success in all its undertakings.

6 Thank you.

Yours sincerely

Annie Tan (Ms)  
Deputy Director, Business Development & Marketing  
Singapore Environment Institute  
National Environment Agency
